🎓 Coursera Profile

🔗 Portfolio

Profile

I am a software engineering student in Bahir Dar University. My primary interest lays in Backend Web Development, Databases, general problem solving, data structure and algorithms.

Skills

Backend Web Development

Worked primarily using Springboot, Laravel, FastAPI, Django and Django-Rest-Framework for API development.

Data Structure and Algorithms with python and c++

I worked with data structures and algorithms in python and c++

Database schema development

Leveraged MS SQL and PostgreSQL databases for schema development

Web Apps deployment with Render.

Flutter

Worked on basic mobile applications with Flutter.

HTML, CSS, JS and React

Frontend development with HTML, CSS, JS and React JS

Courses

Programming For Everybody(Python Data Structures) [🔗](#), University Of Michigan

Projects

Findra [🔗](#)

Full-stack app for discovering opportunities, matching them to user profiles/preferences, and providing AI-assisted tools such as CV extraction, cover letter generation, and skill gap analysis. Includes a Next.js frontend, Django REST API backend, Celery workers, and a separate Telegram bot service for notifications/alerts. Background work can run via Celery/Beat or via secured `/api/cron/*` endpoints (for external schedulers).

Job Finder Telegram Bot [🔗](#)

A telegram bot that searches for available jobs from the most popular telegram channels in Ethiopia and uses AI to match how fitting the user might be for the role from the simple profile setup they give and if it appears compatible, sends alerts to the user about the job.

LogForge [🔗](#)

Logforge is a multi-platform, simple and easy to integrate audit logging package(DevTool) for popular backend frameworks like Django, Laravel and FastAPI. it is published on PyPi and Packagist.

Local Services Aggregator Mobile App [🔗](#)

An application that serves as a platform for aggregating local services. It connects customers who need services with local providers who can offer them.

Organizations

Prodigy Infotech [🔗](#), Backend Web-Development Intern
